XX Eighty four nucleic acids encoding PRO polypeptides, useful in

XX molecular biology, including use as hybridization probes, and in

XX chromosome and gene mapping.

XX Claim 2; Fig 45; 278pp; English.

XX The present sequence is the coding sequence for a human PRO polypeptide

XX (secreted and transmembrane). The PRO protein, and PRO agonists, PRO

XX antagonists or anti-PRO antibodies are useful for preparation of a

XX medicament useful in the treatment of a condition which is responsive to

XX the PRO protein, agonists, antagonists or anti-PRO antibodies. The PRO

XX protein may also be employed as molecular weight markers for protein

XX electrophoresis. The PRO coding sequence has applications in molecular

XX biology, including use as hybridisation probes, and in chromosome and

XX gene mapping.

XX Sequence 1076 BP; 291 A; 285 C; 255 G; 245 T; 0 other;
